

POSTER PRESENTATIONS

No live presentations during the poster sessions will be given, however, attendees will be able to access your presentation at any time and ask potential questions through the comments below the poster. As a poster presenter, you will be asked to watch those comments and answer questions addressed to you.

Presentation requirements and format

English is the official language of BIOMECHANICS 2020 Virtual Meeting, therefore all presentations must be prepared and delivered in English.

To present a poster, presenters are required to prepare:

1. Poster in PDF
 - Template: 4-page PowerPoint Template is attached to this e-mail. You are required to follow the specified structure and instructions in the template and save this PowerPoint presentation to PDF document.
 - Size: the file size is limited to 500 MB
 - Special notes: Please make sure that the content of your poster does not include anything that would be impossible on a printed poster, i.e. no animations and no videos.

Conference participants will be able to see and even download your poster presentation within two months after the meeting. We recognize that this is different from an in-person meeting, and we kindly ask presenters to make sure and include in their poster presentation information and data that are comfortable publishing or have consent to their display.

In case a presentation does not meet the specified conditions, the Scientific Committee reserves the right to not accept your presentation and ask you to edit it.

2. Video presentation of the poster

Poster presenters are asked to provide a short accompanying video describing their poster.

- Template: The three-minute video must be attached to PowerPoint presentation of your poster mentioned in the previous point.
- Length: The maximum length of your poster presentation is 3 minutes.
- Videos should be recorded in 16:9 aspect ratio
- Videos should not exceed 500 mb per video
- Format: Preferred video file format is mp4
